Index to

Aerospace Engineering, Volume 20

January—December 1961

Subject Index (Author Index appears on page 86)

	Month	Page
Aerodynamics and Fluid Mechanics		
Aerodynamic Drag of Ground Effect Machines, Comments on, *Shigenori Ando* and *Jun-ichi Miyashita*	*Nov.*	24
An Aerodynamic-Influence-Coefficient Procedure, *William S. Johnson, Jr.*, and *George W. Martin*	*Sept.*	22
Application of Laminar Flow Control to Transport Aircraft, *Welko E. Gasich*	*Oct.*	22
Blunt-Nosed Slender Bodies, A Study of Flow Fields About Some Typical, *Roberto Vaglio-Laurin* and *Massimo Trella*	*Aug.*	20
Comments on Aerodynamic Drag of Ground Effect Machines, *Shigenori Ando* and *Jun-ichi Miyashita*	*Nov.*	24
Cruciform Wing Body Configurations at High Angles of Attack, Supersonic Induced Rolling-Moment Characteristics of, *J. F. Mello* and *K. R. Sivier*	*July*	20
Data Capsule Ejection Through a Re-Entry Body Wake, *Leonard C. MacAllister* and *Anthony M. Smith*	*May*	8
Design of Hypersonic Aircraft, *Hans Multhopp*	*Feb.*	8
Effects of Boundary Layer and Geometry on Characteristics of Perforated Walls for Transonic Wind Tunnels, *J. Lukasiewicz*	*Apr.*	22
Electrolysis of Water, Flow Visualization by, *Darwin W. Clutter* and *A. M. O. Smith*	*Jan.*	24
Flow Visualization by Electrolysis of Water, *Darwin W. Clutter* and *A. M. O. Smith*	*Jan.*	24
Flying Wind Tunnel, The Navy's, *Henry E. Payne III, Frank R. Carter*, and *Wayne J. Harrison*	*Mar.*	18
"Hydrofoils at the Crossroads," In the Wake of, *Various Contributors*	*May*	28
Hydrofoils at the Crossroads, *J. J. Stilwell, P. W. Nelson*, and *W. R. Porter*	*Mar.*	10
Hypersonic Aircraft, Design of, *Hans Multhopp*	*Feb.*	8
Hypersonic Flight, Optimization of Airfoils, *Coleman duP. Donaldson* and *K. Evan Gray*	*Jan.*	18
In the Wake of . . ."Hydrofoils at the Crossroads," *Various Contributors*	*May*	28
Inviscid Hypersonic Aerodynamics, Recent Soviet Advances in, *Ronald F. Probstein*	*July*	10
Laminar Flow Control to Transport Aircraft, Application of, *Welko E. Gasich*	*Oct.*	22
The Navy's Flying Wind Tunnel, *Henry E. Payne III, Frank R. Carter*, and *Wayne J. Harrison*	*Mar.*	18
Optimization of Airfoils for Hypersonic Flight, *Coleman duP. Donaldson* and *K. Evan Gray*	*Jan.*	18
Recent Soviet Advances in Inviscid Hypersonic Aerodynamics, *Ronald F. Probstein*	*July*	10
Re-Entry Body Wake, Data Capsule Ejection Through a, *Leonard C. MacAllister* and *Anthony M. Smith*	*May*	8
A Study of Flow Fields About Some Typical Blunt-Nosed Slender Bodies, *Roberto Vaglio-Laurin* and *Massimo Trella*	*Aug.*	20
Supersonic Induced Rolling-Moment Characteristics of Cruciform Wing Body Configurations at High Angles of Attack, *J. F. Mello* and *K. R. Sivier*	*July*	20
Transonic Wind Tunnels, Effects of Boundary Layer and Geometry on Characteristics of Perforated Walls for, *J. Lukasiewicz*	*Apr.*	22
Aeroelasticity		
Aeroelasticity—It Still Poses Important Problems (Aerospace Technology as Seen by the Panels), *R. L. Bisplinghoff*	*Sept.*	29
Communications		
Commercial Communications, Use of Satellites in, *Leonard Jaffe*	*Feb.*	14
Communication—Will the U. S. be First in Space? (Aerospace Technology as Seen by the Panels), *Peter C. Sandretto*	*Sept.*	28
Use of Satellites in Commercial Communications, *Leonard Jaffe*	*Feb.*	14
Control and Guidance		
Agena Satellite Program, Some Experimental Results from the, *Ronald Smelt* and *Col. Frederic Oder*	*Feb.*	10
Control Considerations for a Lunar Soft Landing, *Arnold Peske* and *George Swanlund*	*Feb.*	26
Control of Ground Effect Machines—Preliminary Analysis, *David A. Lieberman, Peter G. Fielding*, and *William H. Neff*	*Dec.*	28
Directional Stability and Control With a Single Gyro, *Philip A. Henning*	*Sept.*	20
Flywheels, Satellite Attitude Stabilization by Means of, *William H. Stuart*	*Sept.*	10
Gas-Floated Spinning Spheres, *J. H. Laub* and *H. D. McGinness*	*Dec.*	26
Gyro Damping—Its Part in Platform Design, *E. M. Fischel*	*May*	16
Lunar Soft Landing, Control Considerations for a, *Arnold Peske* and *George Swanlund*	*Feb.*	26
Man-Machine Dynamics of Nose-Wheel Steering, *Joseph G. Wohl*	*Oct.*	20
Navigational Satellite System, Project Transit—Earth and Aerospace, *John D. Nicolaides*	*Feb.*	20

	Month	Page
A New Look at V/STOL Flying Qualities, *R. C. A'Harrah* and *S. F. Kwiatkowski*	*July*	22
Nose-Wheel Steering, Man-Machine Dynamics of, *Joseph G. Wohl*	*Oct.*	20
Parabolic Velocities, Piloted Simulation Studies of Re-Entry Guidance and Control at, *Rodney C. Wingrove* and *Robert E. Coate*	*Oct.*	10
Pilot Control of Rendezvous, *M. C. Kurbjun, R. F. Brissenden, E. C. Foudriat,* and *B. B. Burton*	*Mar.*	20
Piloted Simulation Studies of Re-Entry Guidance and Control at Parabolic Velocities, *Rodney C. Wingrove* and *Robert E. Coate*	*Oct.*	10
Platform Design, Gyro Damping—Its Part in, *E. M. Fischel*	*May*	16
Project Transit—Earth and Aerospace Navigational Satellite System, *John D. Nicolaides*	*Feb.*	20
Rendezvous, Pilot Control of, *M. C. Kurbjun, R. F. Brissenden, E. C. Foudriat,* and *B. B. Burton*	*Mar.*	20
Roll Requirements, Some Considerations of the Effects of Mission on, *W. M. Aubin*	*Sept.*	16
Satellite Attitude Stabilization by Means of Flywheels, *William H. Stuart*	*Sept.*	10
Single Gyro, Directional Stability and Control With a, *Philip A. Henning*	*Sept.*	20
Some Considerations of the Effects of Mission on Roll Requirements, *W. M. Aubin*	*Sept.*	16
Some Experimental Results From the Agena Satellite Program, *Ronald Smelt* and *Col. Frederic Oder*	*Feb.*	10
Temperature Sensitivity in Germanium Transistors (Adventures in Engineering), *James D. Mason*	*Oct.*	27
V/STOL Flying Qualities, A New Look at, *R. C. A'Harrah* and *S. F. Kwiatkowski*	*July*	22

Editorials

The Forward Look—	*Apr.*	9
H. C. L. and Technical Societies	*Aug.*	7
In Memoriam—Edward Raymond Sharp, 1894–1961	*Sept.*	7
The IAS Looks Ahead	*Mar.*	9
Leadership—the Priceless Ingredient	*Feb.*	7
The Next (X) Year—?	*Oct.*	9
The Pendulum Swings	*May*	7
The Scientist and His Responsibility	*July*	7
The State of Affairs	*Jan.*	7
This Is IAS	*June*	9

Energy Conversion

Brittle Materials, Leading-Edge Design With, *Frank M. Anthony* and *Andrew L. Mistretta*	*Nov.*	20
Conversion of Heat to Electricity, Thermionic, *W. B. Nottingham, G. N. Hatsopoulos,* and *E. N. Carabateas*	*July*	14
Leading-Edge Design With Brittle Materials, *Frank M. Anthony* and *Andrew L. Mistretta*	*Nov.*	20
The Magnetic Particle Clutch—A Versatile Control Element for Rocket Systems, *Richard Grau* and *Bruce A. Chubb*	*Nov.*	18
Nuclear Energy in Space—Radioisotope Auxiliary Power Systems, *Jerome G. Morse* and *Douglas G. Harvey*	*Nov.*	8
Radioisotope Auxiliary Power Systems, Nuclear Energy in Space, *Jerome G. Morse* and *Douglas G. Harvey*	*Nov.*	8
Thermionic Conversion of Heat to Electricity, *W. B. Nottingham, G. N. Hatsopoulos,* and *E. N. Carabateas*	*July*	14

Flight Mechanics

Approximations in Flight Optimization Problems, *John V. Breakwell*	*Sept.*	26
Flight Mechanics—Reliability—One of Today's Dominant Problems (Aerospace Technology as Seen by the Panels), *C. B. Westbrook*	*Oct.*	25
Flight Optimization Problems, Approximations in, *John V. Breakwell*	*Sept.*	26
Maneuverable Manned Vehicles, Supercircular Entry and Recovery With, *Robert H. Smith* and *Joseph A. Menard*	*Oct.*	12
Supercircular Entry and Recovery With Maneuverable Manned Vehicles, *Robert H. Smith* and *Joseph A. Menard*	*Oct.*	12

General Interest

Aeronautical Scientists: How They Work and Where They Publish, Soviet, *Leon Trilling*	*July*	12
Analysis of Weapon Systems Effectiveness, *John G. Barmby*	*Jan.*	14
Finding Rare Documents (Adventures in Engineering), *Pearl I. Young*	*Nov.*	26
Soviet Aeronautical Scientists: How They Work and Where They Publish, *Leon Trilling*	*July*	12
Twenty Times Better—The Story of the Building of a Centrifuge (Adventures in Engineering), *Harry Weitz*	*Dec.*	32
Weapon Systems Effectiveness, Analysis, *John G. Barmby*	*Jan.*	14
We Have the Responsibility to Communicate, *Daniel O. Dommasch*	*May*	12

Instrumentation

Compliance of Nonuniform Gimbals, *Ira Cochin*	*Apr.*	24
Early Blind Flying, *J. H. Doolittle*	*Oct.*	14
Economics of Instrumentation Precision for Space Vehicle Development, *V. R. Boulton*	*Mar.*	30
History's Most Elusive Paper Cup (Adventures in Engineering), *George Blackburne*	*Sept.*	31
Instrumentation Precision for Space Vehicle Development, Economics of, *V. R. Boulton*	*Mar.*	30
Nonuniform Gimbals, Compliance of, *Ira Cochin*	*Apr.*	24
Space Man vs. Space Machine, *A. R. Hibbs*	*Apr.*	20

Management

For the Air Force—A New Scientific Management Technique, *Lee A. Ohlinger*	*Nov.*	10
Management—Relating Industrial Research to Company Goals (Aerospace Technology as Seen by the Panels), *Lewis A. Robert*	*Oct.*	26

Meteorology

Atmosphere Soundings, Optical Tracers for, *Edward R. Manring*	*Sept.*	8
High-Altitude Wind Observations Above Cape Canaveral, *J. W. Smith* and *W. W. Vaughan*	*Oct.*	16

Month Page

Meteorological Satellite Systems in Weather Research and Services, *F. W. Reichelderfer*..... Mar. 22
Optical Tracers for Atmosphere Soundings, *Edward R. Manring*..... Sept. 8
Weather Research and Services, Meteorological Satellite Systems in, *F. W. Reichelderfer*..... Mar. 22
Weather—Take It or Make It, *Luis de Florez*..... Sept. 24

Nuclear Applications

Aerospace Nuclear Power Safety Considerations, *Lt. Col. Joseph A. Connor, Jr*..... May 26
A Conceptual Nuclear Propulsion System for Ground Effect Machines, *J. C. Westmoreland, J. B. Dee*, and *J. E. Loos*..... July 16
Cosmic Rays, Nuclear Reactors, and Manned Space Systems, *David Reitz*..... Apr. 28
Ground Effect Machines, A Conceptual Nuclear Propulsion System for, *J. C. Westmoreland, J. B. Dee*, and *J. E. Loos*..... July 16
Manned Nuclear-Rocket Missions to Mars, A Study of, *S. C. Himmel, J. F. Dugan, Jr., R. W. Luidens*, and *R. J. Weber*..... July 18
Nuclear Electric Power for Space Missions, *Terry W. Koerner* and *John J. Paulson*..... May 18
Nuclear Energy in Space—Radioisotope Auxiliary Power Systems, *J. G. Morse* and *D. G. Harvey*..... Nov. 8
Nuclear Propulsion System for Ground Effect Machines, A Conceptual, *J. C. Westmoreland, J. B. Dee*, and *J. E. Loos*..... July 16
Nuclear Reactors, and Manned Space Systems, Cosmic Rays, *David Reitz*..... Apr. 28
Nuclear Rocket Stages Increase Saturn's Payload Capability, *Willis Y. Jordan, Jr., Donald R. Saxton*, and *Paul G. Thomas*..... May 14
Radioisotope Auxiliary Power Systems, Nuclear Energy in Space, *Jerome G. Morse* and *Douglas G. Harvey*..... Nov. 8
Saturn's Payload Capability, Nuclear Rocket Stages Increase, *Willis Y. Jordan, Jr., Donald R. Saxton*, and *Paul G. Thomas*..... May 14
Space Missions, Nuclear Electric Power for, *Terry W. Koerner* and *John J. Paulson*..... May 18
A Study of Manned Nuclear-Rocket Missions to Mars, *S. C. Himmel, J. F. Dugan, Jr., R. W. Luidens*, and *R. J. Weber*..... July 18

Operations

Air Transportation, Short-Haul, *William P. Kennedy*..... Dec. 24
Aircraft Dynamic Response in Real-Time by a Digital Computer System, Reproduction of, *Henry J. Wychorski*..... May 10
Aircraft Launching and Recovery Systems: Recent Advances and Their Potential Application to Commercial Aircraft—Part I, *Capt. William C. Fortune*..... Apr. 12
Aircraft Launching and Recovery Systems: Recent Advances and Their Potential Application to Commercial Aircraft—Part II, *Capt. William C. Fortune*..... May 24
Antisubmarine Warfare, Problems of, *John E. Clark*..... Dec. 14
Application of Laminar Flow Control to Transport Aircraft, *Welko E. Gasich*..... Oct. 22
Astronautics, Soviet Space Experiments and, *F. J. Krieger*..... July 8
Boosters—Analysis of Their Potentialities, Recoverable Air-Breathing, *C. W. Frick* and *T. Strand*..... Feb. 22
Commercial Aircraft—Part I, Aircraft Launching and Recovery Systems: Recent Advances and Their Potential Application to, *Capt. William C. Fortune*..... Apr. 12
Part II..... May 24
The Fleet Carrier Attack Problem in Limited War, *George R. Gehrkens*..... Dec. 12
Future Anti-Air Warfare—The Missile Threat, *W. Paul Thayer*..... Dec. 16
Laminar Flow Control to Transport Aircraft, Application of, *Welko E. Gasich*..... Oct. 22
Naval Attack Aviation for Limited War, 1965–1975, *Richard Hutton*..... Dec. 10
Navy/Industry Look at the Future, A Political Economist Views the, *Oskar Morgenstern*..... Dec. 22
One-Shot Mission Success at Minimum Cost, *W. E. Cox* and *W. W. Harter*..... Nov. 22
Operations—V/STOL Worries Lie Ahead (Aerospace Technology as Seen by the Panels), *Benjamin S. Kelsey*..... Sept. 30
A Political Economist Views the Navy/Industry Look at the Future, *Oskar Morgenstern*..... Dec. 22
Problems of Antisubmarine Warfare, *John E. Clark*..... Dec. 14
Rapid Sea-Wide Supply, *Donald W. Douglas, Jr.* Dec. 18
Recoverable Air-Breathing Boosters—Analysis of Their Potentialities, *C. W. Frick* and *T. Strand*..... Feb. 22
Recovery Systems: Recent Advances and Their Potential Application to Commercial Aircraft—Part I, Aircraft Launching and, *Capt. William C. Fortune*..... Apr. 12
Part II..... May 24
Reproduction of Aircraft Dynamic Response in Real-Time by a Digital Computer System, *Henry J. Wychorski*..... May 10
Research Management?, Whither Aerospace Industry, *Lewis A. Rodert*..... Mar. 24
The RIAS Enterprise, *Welcome W. Bender*..... Feb. 28
Short-Haul Air Transportation, *William P. Kennedy*..... Dec. 24
Space Experiments and Astronautics, Soviet, *F. J. Krieger*..... June 8
Whither Aerospace Industry Research Management?, *Lewis A. Rodert*..... Mar. 24

Propulsion Systems

A Conceptual Nuclear Propulsion System for Ground Effect Machines, *J. C. Westmoreland, J. B. Dee*, and *J. E. Loos*..... July 16
Base Flow Characteristics of Missiles With Cluster-Rocket Exhausts, *B. H. Goethert*..... Mar. 28
Experimental Designs for Rocket Motors, *Norman R. Garner, D. E. Hartvigsen*, and *Richard W. Vail, Jr.*..... Mar. 12
Free Turbine Systems in Rotary Wing Aircraft, *Henry F. Hrubecky*..... Jan. 10
Ground Effect Machines, A Conceptual Nuclear Propulsion System for, *J. C. Westmoreland, J. B. Dee*, and *J. E. Loos*..... July 16
Jet Aircraft—Selection and Design, Thrust Reversers for, *John C. Pickerd*..... Jan. 30
Laminar Flow Aircraft, Propulsion Systems for, *J. W. Connors, W. Pfenninger*, and *C. B. Smith* Aug. 16
Manned Nuclear-Rocket Missions to Mars, A Study of, *S. C. Himmel, J. F. Dugan, Jr., R. W. Luidens*, and *R. J. Weber*..... July 18
Missiles With Cluster-Rocket Exhaust, Base Flow Characteristics of, *B. H. Goethert*..... Mar. 28
A New Type of Thermal Radiator for Space Vehicles, *Roger C. Weatherston* and *William E. Smith*..... Jan. 16

	Month	Page
Nuclear Propulsion System for Ground Effect Machines, A Conceptual, *J. C. Westmoreland, J. B. Dee,* and *J. E. Loos*	*July*	16
Propellant Specific Impulse and Density, Trade-Off Between, *Leonard J. Gordon*	*Nov.*	12
Propulsion Requirements, Supersonic Transport Propulsion, *Mark R. Nichols*	*Sept.*	12
Propulsion Systems for Laminar Flow Aircraft, *J. W. Connors, W. Pfenninger,* and *C. B. Smith*	*Aug.*	16
Rocket Motors, Experimental Designs for, *Norman R. Ganner, D. E. Harvigsen,* and *Richard W. Vail, Jr.*	*Mar.*	12
Rotary Wing Aircraft, Free Turbine Systems in, *Henry F. Hrubecky*	*Jan.*	10
Space Vehicles, A New Type of Thermal Radiator for, *Roger C. Weatherston* and *William E. Smith*	*Jan.*	16
A Study of Manned Nuclear-Rocket Missions to Mars, *S. C. Himmel, J. F. Dugan, Jr., R. W. Luidens,* and *R. J. Weber*	*July*	18
Supersonic Transport Propulsion Requirements, *Mark R. Nichols*	*Sept.*	12
Thermal Radiator for Space Vehicles, A New Type of, *Roger C. Weatherston* and *William E. Smith*	*Jan.*	16
Thrust Reversers for Jet Aircraft—Selection and Design, *John C. Pickerd*	*Jan.*	30
Trade-Off Between Propellant Specific Impulse and Density, *Leonard J. Gordon*	*Nov.*	12

Space Physics

Approximating Technique for Variational Problems, *Lu Ting*	*Jan.*	32
The Hodograph and Ballistic Missile Trajectory Problems, *Erwin W. Paul*	*Feb.*	24
Injection Schemes for Obtaining a Twenty-Four Hour Orbit, *Rudolf F. Hoelker* and *Robert Silber*	*Jan.*	28
Manned Space Flight, Space Physics: Environment for (Aerospace Technology as Seen by the Panels), *John C. Evvard*	*Dec.*	9
Natural Satellites of the Earth, Tektites and, *John A. O'Keefe* and *Barbara E. Shute*	*July*	26
Space Physics: Environment for Manned Space Flight (Aerospace Technology as Seen by the Panels), *John C. Evvard*	*Dec.*	9
Tektites and Natural Satellites of the Earth, *John A. O'Keefe* and *Barbara E. Shute*	*July*	26
Trajectory Problems, The Hodograph and Ballistic Missile, *Erwin W. Paul*	*Feb.*	24
Twenty-Four Hour Orbit, Injection Schemes for Obtaining a, *Rudolf F. Hoelker* and *Robert Silber*	*Jan.*	28
Variational Problems, Approximating Technique for, *Lu Ting*	*Jan.*	32

Structures and Materials

All-Welded Tubular Truss Core Sandwich, Development of, *Bertram Klein*	*May*	22
Ballistic Missiles and Space Vehicles, Sandwich Construction for Primary Structure of, *Ralph F. Foral*	*July*	24
Biaxial Stress Problems in Fabric Structures, An Introduction to, *A. D. Topping*	*Apr.*	18
Cross Method, Thermal-Stress Analysis of Sandwich-Type Cylindrical Shells by the, *John C. Yao*	*Aug.*	24
Design Implications of Creep in Pressurized Cylindrical Shells, *Ivan Rattinger* and *Joseph Padlog*	*Mar.*	26
Development of an All-Welded Tubular Truss Core Sandwich, *Bertram Klein*	*May*	22
Ductile Materials, Tensile Instability (Necking) of, *F. R. Shanley*	*Dec.*	30
Effect of Forming and Welding on Stainless Steel Columns, *Robert E. Petersen* and *Axel O. Bergholm*	*Apr.*	26
High Stress Level Fatigue, A Unified Engineering Theory of, *Sitaram Rao Valluri*	*Oct.*	18
Hypersonic Re-Entry Glide Vehicle, Modes of Failure of a, *Jerome E. Fischler*	*Sept.*	14
Hyperthermal Gas-Fueled Materials Test Facility, *M. John Brown*	*Aug.*	18
An Introduction to Biaxial Stress Problems in Fabric Structures, *A. D. Topping*	*Apr.*	18
Mechanisms of Surface Removal From Metals in Space, *John L. Ham*	*May*	20
Metals in Space, Mechanisms of Surface Removal From, *John L. Ham*	*May*	20
Modes of Failure of a Hypersonic Re-Entry Glide Vehicle, *Jerome E. Fischler*	*Sept.*	14
On the Development of Low-Cost, Formable, All-Metal Sandwich Panels With Corrugated Cores, *Mortimer J. Lowy* and *Robert I. Jaffee*	*Nov.*	14
Tensile Instability (Necking) of Ductile Materials, *F. R. Shanley*	*Dec.*	30
Pressurized Cylindrical Shells, Design Implications of Creep in, *Ivan Rattinger* and *Joseph Padlog*	*Mar.*	26
Response of Plates to Moving Shocks, *Eric E. Ungar*	*Mar.*	16
Sandwich Construction for Primary Structure of Ballistic Missiles and Space Vehicles, *Ralph F. Foral*	*July*	24
Sandwich Panels With Corrugated Cores, On the Development of Low-Cost, Formable, All-Metal, *Mortimer J. Lowy* and *Robert I. Jaffee*	*Nov.*	14
Sandwich-Type Cylindrical Shells by the Cross Method, Thermal-Stress Analysis of, *John C. Yao*	*Aug.*	24
Shocks, Response of Plates to Moving, *Eric E. Ungar*	*Mar.*	16
Space Vehicles, Sandwich Construction for Primary Structure of Ballistic Missiles and, *Ralph F. Foral*	*July*	24
Stainless Steel Column, Effect of Forming and Welding on, *Robert E. Petersen* and *Axel O. Bergholm*	*Apr.*	26
Test Facility, Hyperthermal Gas-Fueled Materials, *M. John Brown*	*Aug.*	18
A Unified Engineering Theory of High Stress Level Fatigue, *Sitaram Rao Valluri*	*Oct.*	18

Support

Aircraft Support Equipment at Sea, *Leonard Lipson* and *Thomas A. Lyle*	*June*	18
Application of Operations Research for Site Planning Facilities Support, *Phillip J. Daniel*	*June*	26
Automatic In-Flight Evaluation, Support of Fire Control Reliability by, *Stuart T. Belden*	*June*	30
Central Management, Networks of Decentralized Decisions Under, *R. W. Bragg* and *Edward B. Hincks*	*June*	14
Compatibility of Freon 114 Used in Mercury Support Equipment With Various Hose Materials, *W. C. Stormer*	*June*	28
Corrosion Problems Encountered in Silo Storage of Missiles, *Leo E. Gatzek*	*June*	34
Design of Space Power Systems, Environmental Problems in the, *M. A. Zipkin*	*Aug.*	14

	Month	Page
Electromechanical Field Maintenance Equipment, Hawk Hydraulic and, *Theodore Jacobsohn* and *Henry A. Matarazzo*	*June*	36
Electronic Repair Shops, Hawk Missile System, *W. J. Perreault*	*June*	16
Environmental Problems in the Design of Space Power Systems, *M. A. Zipkin*	*Aug.*	14
Equipment at Sea, Aircraft Support, *Leonard Lipson* and *Thomas A. Lyle*	*June*	18
The First Titan Hardened Facilities, *Marvin J. Kudroff*	*June*	10
Freon 114 Used in Mercury Support Equipment With Various Hose Materials, Compatibility, of, *W. C. Stormer*	*June*	28
Hawk Hydraulic and Electromechanical Field Maintenance Equipment, *Theodore Jacobsohn* and *Henry A. Matarazzo*	*June*	36
Hawk Missile System Electronic Repair Shops, *W. J. Perreault*	*June*	16
Lunar Support Equipment—The Time Is Now, Support—(Aerospace Technology as Seen by the Panels), *Gilbert Rolan*	*Dec.*	8
The Mini-Recorder System, *J. B. Renfro*	*June*	32
Minuteman Missile Transportation System, *George T. Drakeley*	*June*	22
Missile Ranges in Support of Space, The Role of the National, *Paul T. Cooper*	*Sept.*	18
Networks of Decentralized Decisions Under Central Management, *R. W. Bragg* and *Edward B. Hincks*	*June*	14
Operation Non-Routine: Maintenance Support Trends of Subsonic and Supersonic Transports, *P. A. Hartline*	*June*	38
Parabolic Velocities, Piloted Simulation Studies of Re-Entry Guidance and Control at, *Rodney C. Wingrove* and *Robert E. Coate*	*Oct.*	10
Piloted Simulation Studies of Re-Entry Guidance and Control at Parabolic Velocities, *Rodney C. Wingrove* and *Robert E. Coate*	*Oct.*	10
Range Safety—A Necessary Evil, *Adolf H. Knothe*	*June*	20
Rapid Sea-Wide Supply, *Donald W. Douglas, Jr.*	*Dec.*	18
Rocket Vehicles, Vertical Floating Launch of, *Lt. Comdrs. J. E. Draim* and *C. E. Stalzer*	*June*	12
The Role of the National Missile Ranges in Support of Space Operations, *Paul T. Cooper*	*Sept.*	18
Silo Storage of Missiles, Corrosion Problems Encountered in, *Leo E. Gatzek*	*June*	34
Site Planning Facilities Support, Application of Operation Research for, *Phillip J. Daniel*	*June*	26
Space and Democracy, *Richard S. Morse*	*June*	24
Subsonic and Supersonic Transports, Operation Non-Routine: Maintenance Support Trends of, *P. A. Hartline*	*June*	38
Support—Lunar Support Equipment—The Time Is Now (Aerospace Technology as Seen by the Panels), *Gilbert Rolan*	*Dec.*	8
Support—Problems in Concurrent Development and Production (Aerospace Technology as Seen by the Panel), *William R. Owens*	*Nov.*	6
Support of Fire Control Reliability by Automatic In-Flight Evaluation, *Stuart T. Belden*	*June*	30
Titan Hardened Facilities, The First, *Marvin J. Kudroff*	*June*	10
Transportation System, Minuteman Missile, *George T. Drakeley*	*June*	22
Vertical Floating Launch of Rocket Vehicles, *Lt. Comdrs. J. E. Draim* and *C. E. Stalzer*	*June*	12
X-15 Flight Simulation Program, *Norman R. Cooper*	*Nov.*	16

Vehicle Design

	Month	Page
Airborne With the Curtiss A-1 Replica, *D. P. Germeraad*	*Dec.*	20
The Application of Impulsive Excitation to In-Flight Vibration Testing, *Vaughn L. Beals and Stanley R. Hurley*	*Jan.*	8
An Approach to Operational Features Desirable in a Militarily Acceptable GEM, *Peter G. Fielding*	*Feb.*	18
Cargo Airplane Characteristics, V/STOL, *W. C. J. Garrard*	*Jan.*	22
A Conceptual Nuclear Propulsion System for Ground Effect Machines, *J. C. Westmoreland, J. B. Dee,* and *J. E. Loos*	*July*	16
Design of Hypersonic Aircraft, *Hans Multhopp*	*Feb.*	8
Design Problems, Hovercraft—Some, *R. Stanton Jones*	*Feb.*	16
Dyna-Soar: A Review of the Technology, *Yusuf A. Yoler*	*Aug.*	8
Ejectable-Nose Escape Capsule, Supersonic, *Mell D. Cassidy* and *Philip J. Sullivan*	*Mar.*	14
GEM's, Performance of Nomograms for, *Peter G. Fielding*	*Aug.*	10
Ground Effect Machines, A Conceptual Nuclear Propulsion System for, *J. C. Westmoreland, J. B. Dee,* and *J. E. Loos*	*July*	16
Hovercraft—Some Design Problems, *R. Stanton Jones*	*Feb.*	16
Hypersonic Aircraft, Design of, *Hans Multhopp*	*Feb.*	8
The Inflated Satellite: Characteristics in Sunlight and Darkness, *Herman Mark* and *Simon Ostrach*	*Apr.*	10
The Interdependence of Manned Spacecraft Design and Radiation Shielding, *L. J. Barbieri* and *S. Lampert*	*Apr.*	14
Lifting Fan Design Selection and Performance, V/STOL Logistic Transport, *Elliot Kazan* and *Wilbur Bergen*	*Apr.*	16
Manned Spacecraft Design and Radiation Shielding, The Interdependence of, *L. J. Barbieri* and *S. Lampert*	*Apr.*	14
Nuclear Propulsion System for Ground Effect Machines, A Conceptual, *J. C. Westmoreland, J. B. Dee,* and *J. E. Loos*	*July*	16
Operational Features Desirable in a Militarily Acceptable GEM, An Approach to, *Peter G. Fielding*	*Feb.*	18
Performance of Nomograms for GEM's, *Peter G. Fielding*	*Aug.*	10
Radiation Shielding, The Interdependence of Manned Spacecraft Design, *L. J. Barbieri* and *S. Lampert*	*Apr.*	14
Rapid Sea-Wide Supply, *Donald W. Douglas, Jr.*	*Dec.*	18
Satellite: Characteristics in Sunlight and Darkness, The Inflated, *Herman Mark* and *Simon Ostrach*	*Apr.*	10
Supersonic Ejectable-Nose Escape Capsule, *Mell D. Cassidy* and *Phillip J. Sullivan*	*Mar.*	14
Vehicle Design—Some Notes on Aerospace Vehicle Design Trends (Aerospace Technology as Seen by the Panels), *Adolph Burstein*	*Oct.*	24
Vehicle Design—A Survey of Vehicle Design Problems (Aerospace Technology as Seen by the Panels), *C. E. Pappas*	*Nov.*	7
Vibration Testing, The Application of Impulsive Excitation to In-Flight, *Vaughn L. Beals* and *Stanley R. Hurley*	*Jan.*	8

	Month	Page
V/STOL Aircraft Flight Test Experience, XV-3 Low-Disc-Loading, *C. E. Davis* and *R. L. Lichten*	*Aug.*	22
V/STOL Cargo Airplane Characteristics, *W. C. J. Garrard*	*Jan.*	22

An Authorized Binding For

Aerospace Engineering

Arrangements have been made by the Institute of the Aerospace Sciences for members and subscribers to have their magazines bound carefully and economically. Simply write for details to:
Publishers' Authorized Bindery Service Ltd., 430 West Erie St., Chicago 10, Ill.
